

**Main Department of Geology under the Government of  
the Republic of Tajikistan**

**Dear colleagues and guests,**

On behalf of the Main Department of Geology under the Government of the Republic of Tajikistan, I would like to extend a warm welcome to you at the international Forum and Exhibition titled "International Investment Mining and Metallurgical Forum and Exhibition of Tajikistan". This event is dedicated to the geological exploration, mineral resource base, and their utilisation in the Republic of Tajikistan, with the goal of attracting investment in the exploration and mining industry.

The Forum brings together specialists and experts from various countries with significant experience in mineral forecasting, evaluation, and exploration. In many cases, solving specific challenges requires the consolidation of knowledge and resources, and the integration process is a growing trend worldwide, including in Tajikistan.

Since the early days of independence, the country's leadership has clearly recognised the critical role of mineral resources and the mining sector in the national economy. They affirm with full responsibility that Tajikistan's mining industry is supported by a robust mineral resource base, capable of ensuring long-term sectoral growth.

The Forum's programme includes opening sessions, panel discussions, roundtables, and networking opportunities, providing an excellent platform for exchanging advanced knowledge and expertise in both fundamental and applied geology, and for developing unified approaches to solving geological challenges.

I wish all participants and organisers a productive Forum, constructive dialogue, and effective co-operation!

Regards,  
Ilhomjon Oimuhammadzoda  
Head of the Main Department of Geology  
under the Government of the Republic of Tajikistan
